Olink Lunch and Learn at Bielefeld University - Join Us for an Exclusive In-Person Seminar

Agenda

Join the technology day from the Omics Core Facility NGS and Olink hosted by the CeBiTec and supported by the Medical School OWL.

Discover how Olink's trusted technology is transforming the way to approach multiomics and health research complementing classic mass-spec proteomics.

During the presentation, we will share why Olink technology was the chosen partner for the UK Biobank (UKB) project, the world's largest proteogenomics study with 600,000 samples. Join us to learn how this project is setting new benchmarks for scientific discovery and redefining what's possible in Precision Medicine - potentially the Omics Core Facility NGS at Bielefeld University.

Introduction, Olink Technology, Overview about the Reveal panel and customer use cases
Dr. Matthias Prucha, Olink Proteomics

Chris Mason's impactful conference presentation (Video)

α -Synu-Clear: protein degrader system targeting alpha-synuclein for the treatment of Parkinson
Finn Sorgatz, Felix Müller und Lea Herbertz, IGEM-Team Bielefeld

Q&A - Plans to implement Olink Reveal at Uni Bielefeld/CeBiTec
